CUSTOMER CASE STUDY

ENTERTAINMENT | SOUTH AFRICA

R3 million in duplicate payments prevented.

Daily payment protection with AP Assured, alongside automated invoice capture and submission into Coupa.

R3,000,000
Duplicate payments prevented

Hours saved
Manual invoice entry

The challenge

A South African entertainment group wanted to protect against duplicate payments and reduce the effort involved in entering invoices into Coupa. It needed daily payment checks alongside a more efficient invoice capture process.

Daily protection with AP Assured

The group uses AP Assured to identify and block duplicate payments daily. These checks have prevented R3,000,000 from being paid twice, protecting the business from duplicate expenditure and the subsequent work of recovering overpayments.

Automated invoice processing into Coupa

The group also uses AP Automate to capture invoice data and submit invoices into Coupa. Automating this work saves hours of manual entry, reducing the time spent transferring invoice information into the system.

Protecting cash and freeing up capacity

Together, AP Assured and AP Automate strengthen payment controls and reduce manual processing. Daily duplicate checks protect outgoing payments, while automated invoice capture gives the finance team more time for exceptions and other priorities.

Make more time for the work that matters.
